NATO SAPIENCE
DRONE COMPETITION

Experience the thrilling NATO SAPIENCE Drone Competition, a groundbreaking event hosted by City, University of London in partnership with NATO's Science for Peace and Security (SPS) Programme. This competition aims to redefine AI-based drone technology, similar to the prestigious DARPA Drone Competitions. It gathers top-tier international teams from renowned universities to revolutionise drone and AI technologies for disaster relief scenarios. Participants will showcase diverse approaches and ingenious solutions, fostering a culture of innovation and collaboration that drives advancements in these fields.

Attendees will witness the future of unmanned aerial vehicles as teams unite to innovate and tackle complex challenges. The event will be graced by local authorities, industry professionals, esteemed academics, and media, adding to its excitement and visibility. This competition offers a unique opportunity to be part of a historic moment in the advancement of drone and AI technology.

Join us at our state-of-the-art indoor drone arena and be part of history in the making.

29 and 30 August 2024
City, University of London, Northampton Square

In partnership with

NATO OTAN

This project is supported by: The NATO Science for Peace and Security Programme
